401.942.8000
2160 Cranston St., Cranston, RI 02920

Taco, Inc. is a leading developer and manufacturer of hydronic-based heating and cooling equipment and systems for use in residential, commercial and institutional buildings. The ISO 9001 registered company was founded in 1970 and remains privately owned and operated by the White family. It serves the HVAC industry with a wide range of American made products that have earned a solid reputation for being reliable, durable, easy to install and maintain over the operational life of a building.

Taco LOFlo™ Mixing Block system
A LoadMatch®-based Radiant Heating-Cooling System

Taco, Inc. is ready to tap into the emerging radiant cooling market with its recently introduced LOFlo™ Mixing Block (LME). The LOFlo™ Mixing Block has been designed to work with Taco's LoadMatch® single pipe system along with active-passive chilled beams and a 100 percent DOAS to supply latent cooling.

Taco LoadMatch® System
A New Approach to Hydronic Heating and Cooling

The Taco LoadMatch® system is an innovative approach to hydronic heating and cooling that enables engineers to design and deliver more efficient, more comfortable systems to their customers while saving time, energy and money.

As a Taco Green Product, LoadMatch is ideal for "sustainable design" or "green building" projects and it helps projects qualify for LEED Certification by the U.S. Green Building Council.
